

Why must the government take it upon themselves to further restrict our access to information? This is the whole reason I got XM in the first place: to hear exactly what I want to hear.

What purpose does this bill serve other than to further enrich the proprietors of "traditional" radio? It does nothing for the consumer, you know, those people who you were elected to represent? It further restricts the use of radio to those small numbers of companies who have the monopoly on the airwaves.

Please, stand up for your constituents and the 1.7 million Americans who receive XM Radio. Do not bow to the whims of a strong lobby. REJECT 04-160! REJECT HR 4026!

Respectfully,  
Richard Month
